**Subject:** Objection to Cory Riverside Incinerator application for increase in burning capacity

**FAO The Secretary of State for Business, Energy and Industrial Strategy.**  
c/o Kerry Crowhurst, Energy Infrastructure Planning Team

Dear Ms Crowhurst,

I'm writing this objection to an increase in capacity of my local incinerator at Belvedere.

I find it disgusting that Cory wish to burn more so called waste to make more profit. Prior to planning consent being granted, the mayor of London had already objected to this incinerator's expansion due to London having already got enough capacity. For Cory to then seek even more capacity to burn other borough's waste is completely unacceptable to local people. Waste being transported by barges on the river is in no way green, due to the heavy oil they burn. An increase in lorries would also have a highly detrimental effect on air quality.

There is absolutely zero incentive for this company to promote refusing, reusing, redesigning, repairing and recycling as these would decrease their profits.

Instead they seek to worsen the unfolding climate emergency (burning waste is second only to coal in terms of emissions) and increase cases of respiratory disease, which are worse than average in our local area.

This company has already shown itself to be untrustworthy as it promised to plant trees to screen the current site. These trees do not exist because they didn't plant any. This also makes me wonder if they can be trusted to operate this facility in the correct and safe manner.

So in conclusion this site should be shut down for reasons of health and well-being, and certainly should not be allowed to increase in its scale.

Please refuse this application.

With best wishes,
